An energy efficient light with a stylish design

LED Touch Lamp

LEDs can withstand shock, vibration, frequent switching and extremes without compromising its long life

The LEDs on these lamps never have to be replaced saving you time, money and storage space for replacement bulbs

LEDs use a fraction of the power (80-90%) required by conventional filament bulbs.

Enlightened Benefit:

This product is made of pure recyclable aluminium. Each time you buy our product, you're closing the recycling loop by buying recycled, minimizing waste. Unlike incandescent bulbs, LED bulbs produce minimal amounts of heat, so more electricity goes directly to generating light. Because they lack a filament that won't burn out, LED bulbs last much longer than incandescent bulbs.
